Location: Bekabad, Tashkent, Uzbekistan

Education

Gulistan State University

Information Systems and Technologies (field of study)

2nd-year student (2025–present)

About Me

I am a Python developer focusing on backend development. I learned Python through online courses and, as a university student, continue to strengthen my skills through practice.

I mainly work with Django and REST API technologies, and have built several practical projects, which I've published on my GitHub profile.

I don't have formal work experience yet, but I'm a fast learner, capable of solving problems independently, and ready to work in a team.

Skills

- Python
- Django Framework
- Django Rest Framework
- Linux
- PostgreSQL
- Deployment (nginx && gunicorn)
- Git (GitHub && GitLab)
- API testing (Unit && Postman && Swagger)
