

TURDIALI KHASANBAYEV

Software Engineer (Python / Backend)

Bekabad, Tashkent, Uzbekistan | +998 88 416 20 60 | xasanbayevturdiali7@gmail.com
Website: xasanbayev.uz | GitHub: github.com/turdialixasanbayev | Telegram: t.me/turdialixasanbayev

PROFESSIONAL SUMMARY

Backend-focused Software Engineer with expertise in building reliable, scalable, and maintainable web applications and REST APIs using Python and Django Framework. Proficient in database management with PostgreSQL, web server configuration using Nginx and Gunicorn, and service deployment on Linux (Ubuntu) environments. Adheres strictly to SOLID, DRY, and Clean Code principles to engineer robust backend systems.

TECHNICAL SKILLS

- **Languages:** Python
- **Backend & Frameworks:** Django, Django REST Framework (DRF), RESTful APIs
- **Databases:** PostgreSQL
- **Infrastructure & DevOps:** Linux (Ubuntu), Nginx, Gunicorn, Cloudflare, DigitalOcean
- **Tools & Version Control:** Git, GitHub, GitLab, Postman, Swagger / OpenAPI, Unit Testing
- **Engineering Principles:** SOLID, DRY, Clean Code, OOP, PEP 8

FEATURED PROJECTS

iqtisodiybilim.uz | *Lead Backend Developer*

- An educational web platform designed to improve economic literacy in Uzbekistan.
- Developed and deployed a dynamic web platform using Django and PostgreSQL.
- Configured Nginx reverse proxy and Gunicorn application server for production deployment on Ubuntu Linux.
- Designed clean database schemas and implemented scalable routing middleware for asset performance.

ReelGo Bot (@reelgo_bot) | *Creator & Developer*

- A high-performance Telegram bot for Instagram media processing and audio recognition.
- Built an asynchronous media downloader bot using Python, Aiogram, and yt-dlp.
- Integrated automatic audio recognition capabilities leveraging Shazam API integration.
- Optimized request handling to deliver fast processing and reliable media delivery.

xasanbayev.uz | *Developer Portfolio*

- A developer portfolio engineered around terminal/IDE interface aesthetics.
- Developed custom Django views and clean template structures to render dynamic project data.

EDUCATION

Gulistan State University — Gulistan, Uzbekistan

PRACTICAL WORK & CERTIFICATIONS

- **100 Days of Code (Python):** Intensive hands-on mastery of Python fundamentals, data structures, and backend mechanics.
- **Self-Directed Backend Engineering:** Independent study focused on REST API engineering, clean architecture, and deployment pipeline management.
- **Full Stack Python Development Certificate:** Successfully completed an intensive 1-year professional course covering end-to-end web application development, core Python architecture, Django/DRF backend systems, RESTful APIs, and database engineering.
